SUMMARY

Top 5% Engineering Student (4.65/5.00 CGPA) and Full-Stack Developer with production experience shipping real-time AI agents and fintech-integrated platforms. Proficient in orchestrating low-latency systems (LiveKit, Cerebras) and building performant web applications (Next.js, TypeScript). Founder of a digital agency delivering revenue-generating products for SMEs and non-profits.

Key Highlights: Built real-time AI voice agent pipeline • Delivered 5+ client websites • Top 5% CGPA (4.65/5.0)

SKILLS

LANGUAGES

JavaScript (ES6+), TypeScript, Python, Java (OOP, Data Structures), HTML5, CSS3

FRONTEND

React.js, Next.js, Tailwind CSS, Redux, Framer Motion

BACKEND & AI

Node.js, Express, LiveKit (WebRTC), Cartesia API (TTS), Cerebras (Inference), REST APIs

TOOLS

Git/GitHub, Vercel, Firebase, Figma, Chrome DevTools

TOP STRENGTHS

AI Systems Architecture

Performance Optimization

Product Shipping

Full-Stack Development

EXPERIENCE

Chief Product Officer (CPO)

Nov 2025 – Present

DETOVA LABS — Nigeria

- Led product direction and delivery across cross-functional teams to ship user-focused features faster
- Collaborated with engineering and design to improve UI consistency and product usability

Frontend Developer

Sep 2025 – Nov 2025

DETOVA LABS — Nigeria

- Built responsive UI components and improved frontend stability across key pages
- Worked closely with product stakeholders to translate requirements into production-ready interfaces

Frontend Developer

2023 – Present

Moyocode (Freelance) — Nigeria / Remote

- Delivered 5+ client websites using Next.js, improving speed, engagement, and brand presence
- Built responsive, modern interfaces and optimized performance for mobile-first users

EDUCATION

B.Sc. Software Engineering

Chrisland University
2023 – 2027

CGPA: 4.65 / 5.00 (Top 5%)
Ace in Java Programming & Web Technologies

HOBBIES

< > Hackathons

Participating in hackathons & building fast MVPs

⚽ Football (School Team)

Playing football — member of the school team

🎧 Music

Listening to music while coding and studying

EXPERIENCE (CONTINUED)

Frontend Developer

Aug 2024 – Aug 2025

ResoBridge (Storm Project) — Team Project

- Built frontend dashboards using HTML, CSS, and JavaScript to visualize resource allocation outputs
- Improved usability for student-focused workflows through clean UI structure and clear data presentation

Frontend Developer Intern

Jan 2025 – Mar 2025

GS Tech Hub — Remote/Part-time

- Assisted in building responsive web pages and UI components with modern frontend practices
- Collaborated with developers to debug issues and improve UI consistency

Frontend Web Developer Intern

Jan 2025 – Mar 2025

InternPulse — Remote/Part-time

- Built frontend features and improved layouts for better usability and responsiveness
- Strengthened teamwork, communication, and delivery speed in a real product environment

SELECTED PROJECTS

ConvergsAI (Voice Agent) | AI Engineer (Solo Project)

Present

- Built a real-time conversational AI agent for customer service and sales automation
- Engineered a sub-500ms latency voice pipeline by orchestrating Cerebras (for instant Llama 3 inference), Cartesia (for ultra-fast TTS), and LiveKit (for WebRTC transport)
- Achieved near-human response speeds, enabling seamless full-duplex voice conversations for automated support tasks

SBO Foundation Website | Frontend Developer (Solo)

2025

- Built a responsive foundation website to strengthen digital presence and support fundraising for 25+ education programs
- Implemented a donation-ready workflow and user-friendly contribution flow
- Improved online visibility and helped increase donation activity after launch

LOCOBA Alumni Website | Solo Developer

2025

- Built a modern alumni website to strengthen community growth and improve engagement for the association
- Implemented key features including event updates + RSVP flow, gallery showcase, member registration form, and donation/support section

ResoBridge (Resource Allocation) | Frontend Developer (Team)

2024

- Collaborated on an algorithmic resource allocation system for university logistics
- Developed the client-side logic to interface with backend optimization algorithms
